Student

PROJECT

E-Commercewebsite

GadgetsCartis a TypeScript-based React e-commerce web application focused on sellingelectronic gadgets. It features a modular architecture with components organized for scalabilityand maintainability. Core files like App.tsx and Layout.tsx manage routing and page layout, whileassets (images, icons, CSS) are neatly structured. The project supports responsive design anduser-friendly navigation. It includes essential configuration files such as package.json for dependencies and tsconfig.json for TypeScript settings. The public directory holds static assetsand the main HTML template. Gadgets Cart serves as a solid foundation for building andcustomizing an online gadget store with modern web technologies
